

ARZE

The next-gen ERP for a connected world

Our mission is to liberate businesses from the shackles of manual processes, by automating the ordinary so you can achieve the extraordinary in delivering instant clarity, payments, and insights.

ARZE is the world's first all-in-one platform that automates payroll, invoicing, back-office and business intelligence management powered by AI & DLT for instant, error-free operations.

Project supported by the OVHcloud Startup Program

arzetechologies.com

Businesses are losing billions dollars every year in operational inefficiency

Don't let your business be one of them!

Modern businesses rely on multiple disconnected tools for payroll, invoicing, reporting, back-office and business intelligence operations. Each module requires separate configuration, integration, and training a process that takes **months** and consumes **valuable resources**.

Inefficiencies Block Growth

Manual configuration costs SMEs and mid-market companies hundreds of hours per year, delaying return on investment and creating technical debt from day one.

"The cost of not having an ERP system is even greater: inefficiencies, data silos, poor customer service, and missed opportunities."

Disconnected systems, costly setup

HR teams spend 15+ hours/month correcting payroll issues. Finance teams waste days reconciling invoices and searching for data.

"80% of CFOs say the complexity of their systems delays market expansion."

Poor Visibility, Bad Decisions

Business intelligence tools are often siloed or require manual data extraction from various systems, leading to outdated reports and blind spots in finances.

"Decision-makers cannot act in real time, slowing down execution and creating misalignment between teams."

Cost of inefficiency = lost hours + missed opportunities + technical debt

The world's first autonomous and sovereign ERP

The new standard for autonomous financial infrastructure

ARZE, is designed to automate and optimize financial and operational processes for businesses of all sizes. From payroll to invoicing to fully autonomous back-office and business intelligence operations, ARZE delivers unmatched speed, transparency, and control.

End-to-End ERP automation

ARZE replaces fragmented back-office tools with a unified, AI-powered platform.

"From instant payroll to smart invoicing and automated compliance, everything is set up in minutes, not weeks."

Streamlined operations, lower costs

ARZE reduces manual work by over 75% in payroll, invoicing, compliance and business operations.

"Teams save time, avoid fines, and refocus on growth, not administration."

Real-time insights, better decisions

With ARZE, data flows seamlessly between payroll, finance, HR, and operations.

"Leaders gain instant visibility into cash flow, expenses, headcount, and revenue drivers."

AI-Driven ERP = Accelerated execution <=> More flow = More revenue

The \$90B+ ERP Market Opportunity

Why ARZE is poised to win

Global ERP market growth

Market size & growth

The global ERP software market is expected to grow from **\$53.77 billion in 2024** to **over \$90.63 billion by 2030**, with a **CAGR of 9.07%**.

This growth is fueled by increasing demand for **integrated, cloud-based solutions** that automate financial, operational, and administrative tasks.

AI & automation as core enablers

AI integration & impact

By 2030, AI is expected to be integrated into **80% of back-office functions**, enabling ERP systems to become fully predictive and adaptive.

Companies implementing AI-powered ERP tools report:

- **92% fewer errors**
- **43% lower processing costs**
- **5x faster invoice processing**
- **80% reduction in manual data entry**

Enterprise intelligence gap

Real-time BI adoption

Less than **40% of medium-sized companies** use real-time business intelligence tools.

Without actionable analytics, they struggle to optimize operations, forecast revenue, or detect inefficiencies early on.

The price you pay to focus on winning

Simple, Transparent, High-Value Service

Basic

Monthly: \$999/month
Yearly: \$799/month

Fully automated workflows

1 back-office for 1 database

Real-time BI dashboard

Payroll and Invoicing

Premium

Monthly: \$1,999/month
Yearly: \$1,599/month

Everything in Basic

5 back-offices for 5 databases

Full access on BI analysis
without predictive analytics

Pro

Monthly: \$3,999/month
Yearly: \$3,199/month

Everything in Premium

10 back-offices for 10 databases

Predictive analytics with smart
forecasts.

No More bottlenecks: ARZE automates 90% of back-office tasks so businesses operate smoother, grow faster.

Built for Flow: Designed for leaders who want efficiency without the complexity.

Trust Factor: Finally, an ERP that works for you and not the other way around.

A growing momentum

Recognition, partnerships, and growth

Industry recognition & support

ARZE has already gained strong industry backing, positioning itself as a key innovator in the Hedera ecosystem.

We have secured:

- First business partners officially joined ARZE
- Technical support from the Hashgraph team
- Selection for the OVHcloud Startup Program, providing infrastructure, mentorship, and cloud credits
- Selection for the OVHcloud Blockchain & Web3 Accelerator
- Listing on Messari, enhancing our visibility and credibility within the global Web3 and investment communities

Industry recognition & support

ARZE was awarded 3rd place in the DeFi & AMMs category at the Hello Future Hackathon 2.0, organized by Hedera and AngelHack. This recognition underscores our technological excellence and strong market potential.

Financial Projections

5-Year Market Capture Forecast (2026–2031)

ARZE will be **profitable from Day 1**, grounded in **product-led growth**, and scaled through a **\$16B mid-market gap** where competitors fail and customers win.

Key Assumptions: ARZE’s forecast assumes **15–45% CAGR** based on mid-market ERP demand, white-label scalability, and AI-driven differentiation, with conservative churn and competitive pressure accounted for.

Bearish Scenario (15% CAGR):

ARZE will be the **preferred mid-market ERP** for niche industries, capturing **0.8% of the ERP market** by 2031.

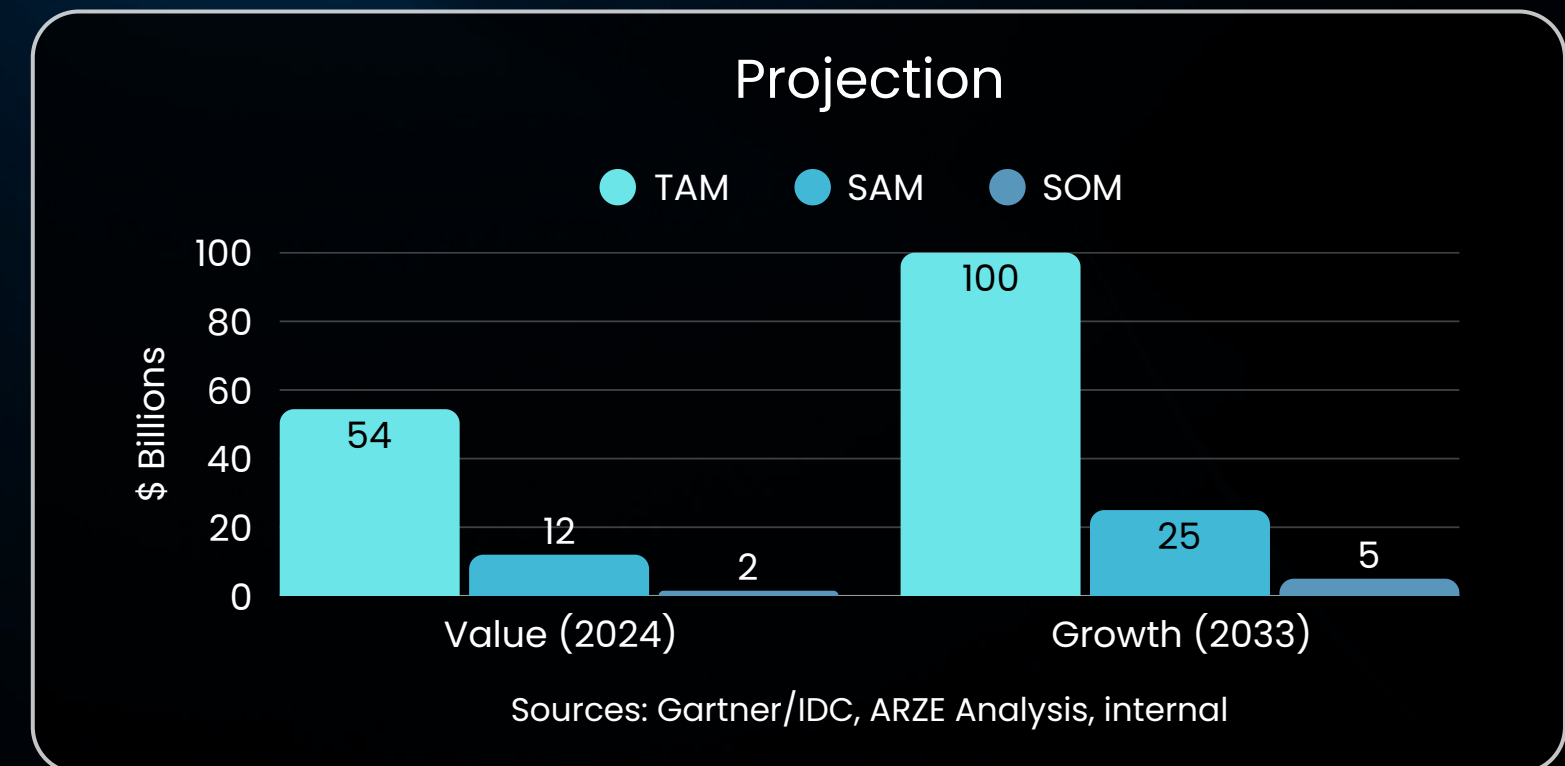

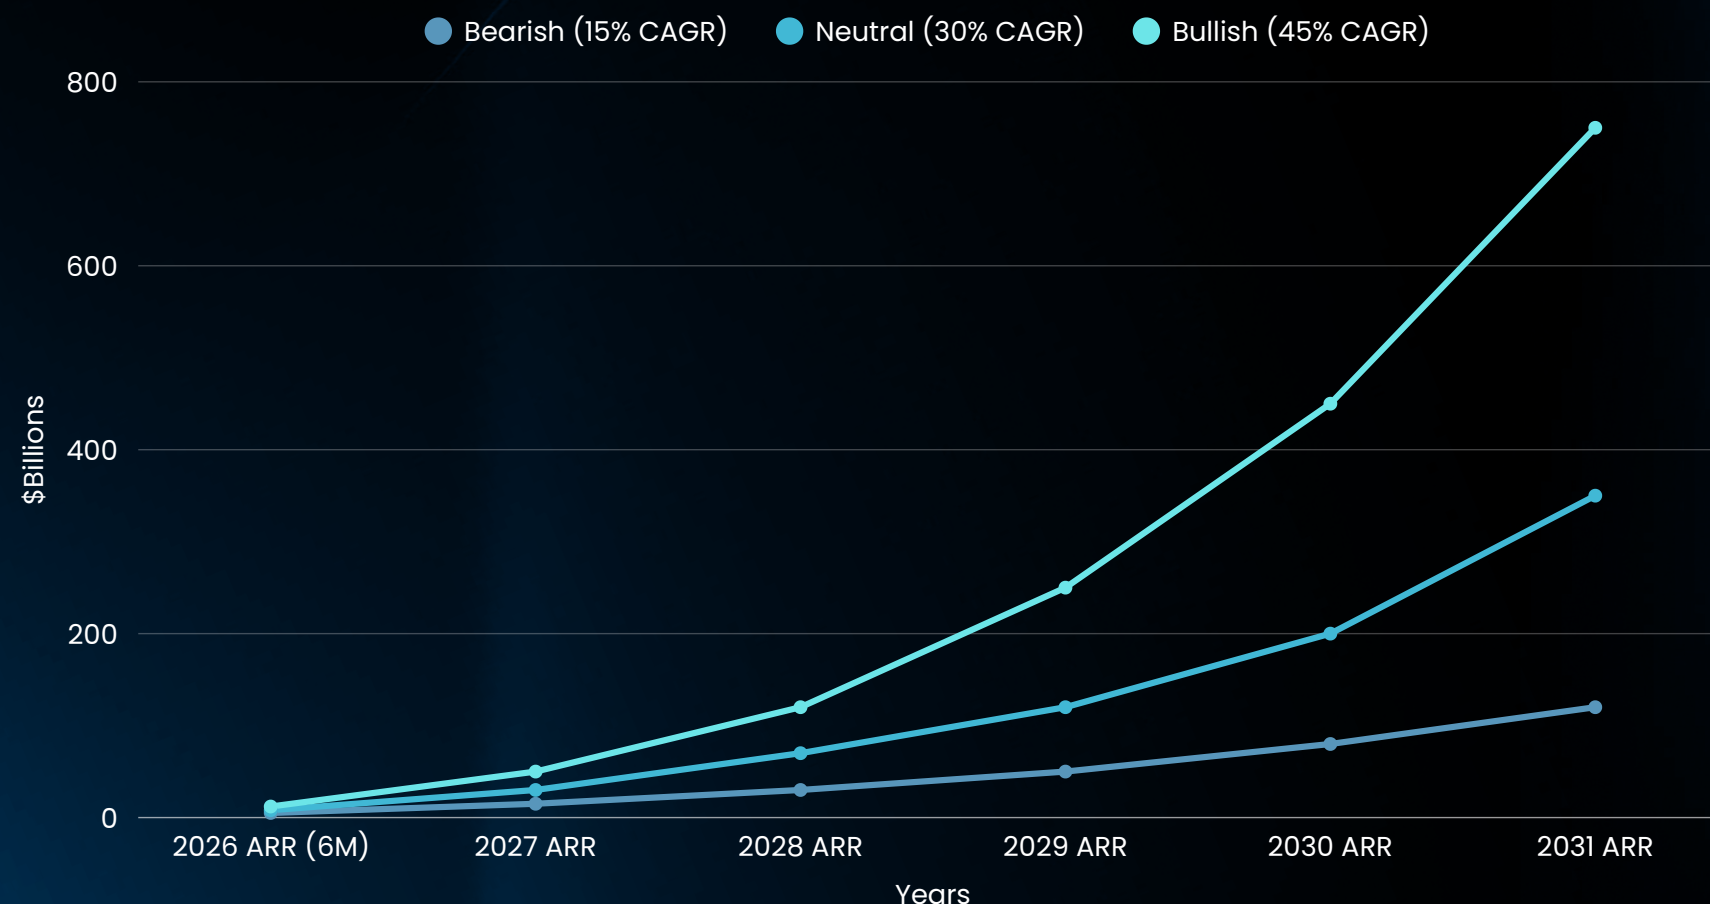

Neutral Scenario (30% CAGR):

ARZE will become a **leading mid-market ERP solution** with strong adoption in North America and Europe, capturing **2.0% of the ERP market** by 2031.

Bullish Scenario (45% CAGR):

ARZE will **disrupt the ERP market** with rapid adoption across industries and geographies, capturing **4.5% of the ERP market** by 2031.

All figures in USD, starting June 2026

What makes ARZE truly unique

Underlying magic to make your business built for autonomy and speed

One click setup: Instant integration, zero hassle

Forget about lengthy migrations and complicated setups. With ARZE, connecting your existing database(s) is as simple as clicking a button. In seconds, you're operational and ready to go. No downtime, no hassle, just seamless integration that lets you hit the ground running.

Smart back office and BI Real-time insights at your fingertips

Our AI is your secret weapon. It works directly with your data and market signals to deliver real-time insights without the need for data extraction or duplication. Make informed decisions quickly and efficiently, and stay ahead of the competition.

Human-centric technology Designed for everyone

We believe technology should adapt to people, not the other way around. ARZE is designed for everyone, regardless of technical knowledge. Our intuitive platform ensures that you and your team can focus on your core tasks without getting bogged down by complex systems.

100% data ownership: Your data, your control

Your data is your most valuable asset, that is why we never collect or centralize your data. It remains private, secure, and fully under your control. You can trust that your sensitive information stays where it belongs, with you.

Full transparency, full transparency & traceability Trust you can rely only & traceability

Trust is the foundation of any successful business relationship. All payroll and invoicing data is recorded on an immutable ledger. This ensures data authenticity, immutable records, and complete traceability. You'll have a single source of truth you can rely on, giving you peace of mind and confidence in your operations.

With ARZE, you're not just getting an ERP system, you are getting a partner that understands your needs and is committed to your success.

Innovators at the heart of technology

Our team is made up of seasoned experts with a passion for technology
We turn ideas into groundbreaking solutions.

Vincent d'Acher

An engineer by training with specialisations in mathematics, computer science and finance, Vincent has over 8 years of experience in technology and entrepreneurship.

Involved in Web3 since 2017 with experience in ICO and tokenomics.

Developed optimisation algorithms, including a highly efficient algorithm for solving MLP and Knapsack problems, essential for optimising any process.

Recently, he found his life's mission as a Creative Thinker and brings a completely innovative analysis to the world of crypto by creating a value protocol to give meaning to transactions and exchanges in a decentralised way and projecting Arze as an application of this protocol.

Antoine Monesma

Full-stack engineer with expertise in web, mobile and Web3 development.

His background includes leading development teams and collaborating with specialists to create goal-oriented applications.

At ARZE, he designs sophisticated systems that leverage AI capabilities while providing specialized technical expertise in Hedera Hashgraph distributed ledger technology.

His methodical approach to harmonising these advanced technologies forms the backbone of ARZE's business automation platform.

Its focus on practical implementation and scalable architecture enables ARZE to deliver solutions that transform the way businesses operate in the digital economy.

Thibaut Monesma

Experienced software engineer with in-depth expertise in cloud infrastructure and large-scale application development.

His professional background includes leading development teams through complex projects and implementing robust enterprise-grade solutions.

At ARZE, he orchestrates the technical implementation of the platform, specialising in cloud architecture and AI-integrated systems.

Thibaut's comprehensive experience with critical applications ensures that ARZE's infrastructure is both scalable and resilient.

His methodical approach to development and technical leadership skills drive the team to deliver high-performance solutions that meet the rigorous demands of modern business automation.

Help us bring ARZE to life

Join us in our quest to raise \$200K

Infrastructure – \$20K

- \$12K: Cloud hosting via OVHcloud to ensure a scalable, high-performance infrastructure capable of handling ERP operations efficiently.
- \$5K: API connectivity for seamless integration with banking systems and HRIS platforms, enabling real-time data flow.
- \$3K: Maintenance and contingency funds to guarantee uptime, reliability, and operational continuity.

Legal & Compliance – \$60K

- \$35K: Fintech compliance costs covering GDPR adherence, SOC 2 audits, and regulatory certifications to operate securely.
- \$15K: IP protection through trademarks and patents, especially for our AI automation processes and proprietary algorithms.
- \$10K: Legal contracts for customers, partners, and vendors, ensuring full regulatory and commercial protection.

Domain & Branding – \$10K

- \$7K: Acquisition of a premium domain (e.g., arze.com) and creation of brand assets including logo, style guide, and visual identity.
- \$3K: Trademark filings to protect the brand name and ensure long-term ownership rights.

Marketing – \$40K

- \$20K: Website design and development, SEO optimization, and targeted LinkedIn campaigns to attract early adopters and raise awareness.
- \$15K: Incentives for beta testers, including referral discounts and engagement programs to ensure high participation.
- \$5K: Production of sales collateral, including pitch decks, case studies, and product demonstration materials.

Product Development – \$70K

- \$40K: Development of core ERP features, including modules for payroll and invoicing.
- \$10K: Security audit and integration testing.
- \$10K: AI automation tools, such as intelligent invoice reconciliation and predictive analytics.
- \$7K: Management of beta program with 100 testers, collecting feedback and iterating on features.
- \$3K: UI/UX enhancements based on beta feedback to ensure a smooth, intuitive user experience.

By investing in ARZE today, you're not simply funding a startup, you're becoming a foundational partner in reshaping how businesses operate in the digital economy. Join us as we build the future of business automation and transform financial operations for companies worldwide.

A world where every business operates effortlessly

Join the aventure, let's shape the future together!
